Base estimator
Risk-calibrated estimator
Integrated signal $B_n(\widehat{\lambda})$
Residual-noise variance $V_n(\widehat{\lambda})$
Total risk $R_n(\widehat{\lambda})$
Weight norm $\|\widehat{\gamma}_{\widehat{\lambda}}\|_2^2$
Evaluation-sample imbalance $\|\Delta_E(\widehat{\gamma}_{\widehat{\lambda}})\|^2$
Strong overlap
Intermediate weak overlap
Severe weak overlap
Uniform
